

Please Support Labeling of Genetically Modified Foods, **Bill HB 6519**

Dear Public Health Committee,

My name is Chelsey Hahn, and as a person who eats, I urge you to support the Labeling of Genetically Modified Foods, Bill HB 6519. I will be attending the hearing tomorrow and as it will be my first trip to the State House I will be excited to see you side with the people and not Big-Agriculture on this important issue. Food policy should reflect safety for the consumers, and not just safety of profits.

Labeling is important as all consumers should have the right to know what is in their food. Agriculture that is dependent on chemicals is something I try to avoid, these chemicals can get into the food supply and are linked to cancer, infertility and gastrointestinal diseases.

Our food supply should not be the cause of these health disparities!!

Please support this bill as food issues are matters of health and the environment and are effect everyone. Thank you for your time.

Chelsey Hahn
